

February 12, 2018

Dear Distribution Partners/Sales Team

This PCN is to inform you of a change to the epoxy coating material of the Cornell Dubilier Quencharc (Q/QRL) product lines. The epoxy coating on the Quencharc product has been changed to a halogen-free material. The new material is equivalent to the previous material with respect to form-fit-function, including the UL94V-0 flame retardant rating. Parts coated with the new material will be marked "H/F" to denote halogen-free. As the change does not affect form, fit or function it is being implemented as running change, effective immediately, with no change to the CDE part number.

Implementation Status/Date: January 31, 2018.

Parts with date codes prior to this date will not contain halogen-free material.

Please do not hesitate to contact me if you have any questions.

Sincerely,

--

Chris Kelly

Product Manager
